Daily Dev Digest

Automated GitHub Trending Briefing - Delivered to Your Inbox Every Morning

Zapier | Webhooks | Gmail | Automation

Capstone Project - AI for Office Automation

THE PROBLEM

How do developers stay current with what's trending in tech?

Time-Consuming

Manually browsing GitHub Trending every day takes 20 - 30 minutes.

Easy to Miss

Without a routine check, developers fall behind on emerging tools, libraries, and frameworks.

Repetitive

The same manual task is repeated daily a perfect candidate for full automation.

THE WORKFLOW

3-Step Zapier Automation

1

Schedule by Zapier

Trigger

Runs automatically every day at a set time - zero manual action required.

2

Webhooks by Zapier

GET Request

Fetches live trending GitHub repositories - repo, stars, descriptions, language.

3

Gmail

Send Email

Delivers a clean, formatted table of trending repos straight to your inbox.

LIVE OUTPUT

What arrives in your inbox every morning

Daily Dev Digest - Trending GitHub Repositories

Repository	Description	Stars	Language
